Balance — User Guide for Judges

Balance helps a university student whose plan no longer fits the day. It shows how far the day is over capacity, compares safe ways to fix it, changes nothing until the student confirms, protects real free time for rest, and lets the student reflect privately.

Time needed: about 15 minutes for the full walkthrough. **Help needed:** none.

This guide has three parts:

- **Part A — Walkthrough (steps 1–8):** do these in order to see the whole journey.
- **Part B — Page reference:** every button and label on every page, for checking details.
- **Part C — Glossary, privacy, troubleshooting and limitations.**

> **About the screenshots.** They were taken on a team test account that holds the same sample data as the judge account, on a day called *Sunday 11 October*. On the judge account the sample day is **Sunday 1 November 2026**; everything else looks the same.

Part A — Walkthrough

Quick path

Step	Page	What you will do	Time
1	—	Install, sign in, read the three-page introduction	2 min
2	TODAY	See a 2-hour overload, the day's free time and tasks, and five workload bars	3 min
3	QUESTS	Open the two tasks behind the overload	1 min
4	COUNCIL	Read the suggested fix and confirm it	2 min
5	COUNCIL	Check the result, then undo the plan from Plan history	2 min
6	SANCTUARY	Protect 30 minutes of rest from a suggested free time, then remove it	2 min
7	JOURNEY	See the weekly summary, the achievement wall and a new badge	2 min
8	PROFILE	Optional: sound, reminders and overload alerts	1 min

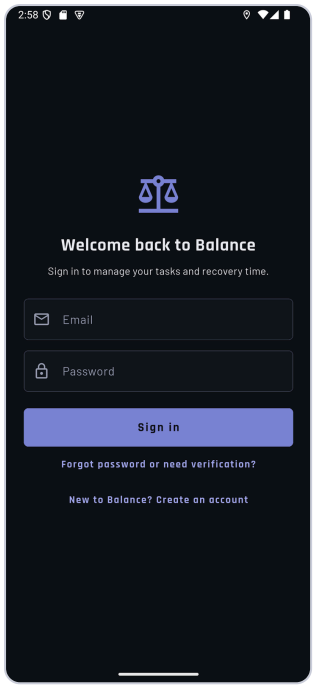

Before you start

You need	Details
An Android phone	Android 8.0 or later, with internet.
Malaysia time on the phone	Settings → System → Date & time → use automatic time zone. Balance shows times in the phone's time zone.
The Balance app	Latest release → download `app-release.apk`.
The judge account	Email and password are in our submission form. They are never stored in this repository.
The sample day	**Sunday 1 November 2026.** On that date Balance opens directly on it.

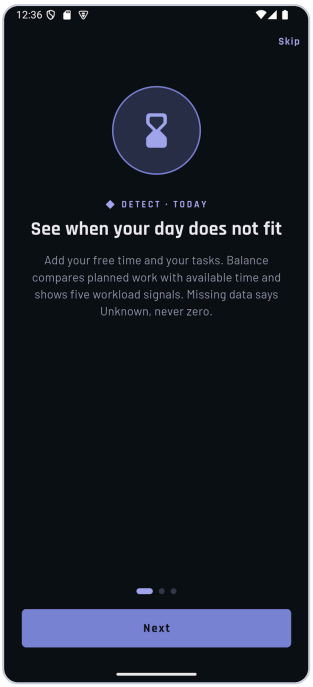

Shared account. All judges use the same account. Please undo any plan you confirm and remove any recovery time you add (steps 5 and 6), so the next judge sees the same day.

Step 1 — Install, sign in and read the introduction

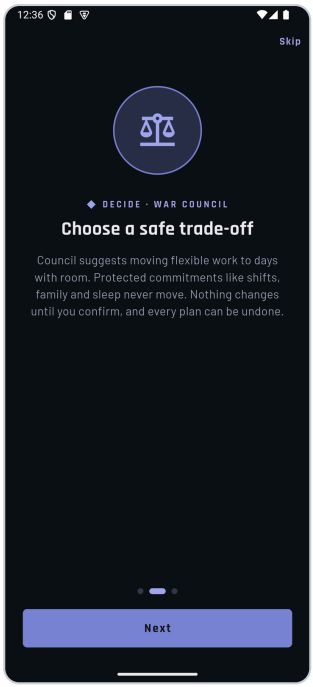

1. On the phone, open the release link and download `app-release.apk`.
2. Open the downloaded file. If Android asks, allow installing apps from this source, then tap **Install**. If an older Balance build is installed, uninstall it first.
3. Open **Balance**. Enter the judge **Email** and **Password** and tap **Sign in**. *Forgot password or need verification?* and *Create an account* are not needed.
4. The first time, a three-page introduction appears: **Detect**, **Decide** and **Recover and reflect**. Read each page and tap **Next**, then **Get started**. **Skip** closes it at any time. You can reopen it later from **Profile** → **How Balance works**.

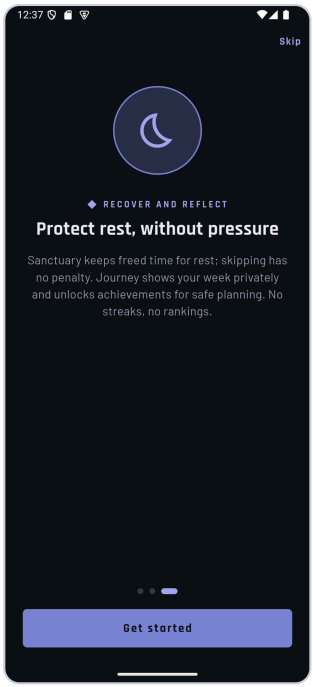

Sign-in screen

Introduction, page 1 of 3

Introduction, page 2 of 3

Introduction, page 3 of 3

You now see the **TODAY** page. If a yellow "Local preview" banner appears, this is not the release build; reinstall from the release link.

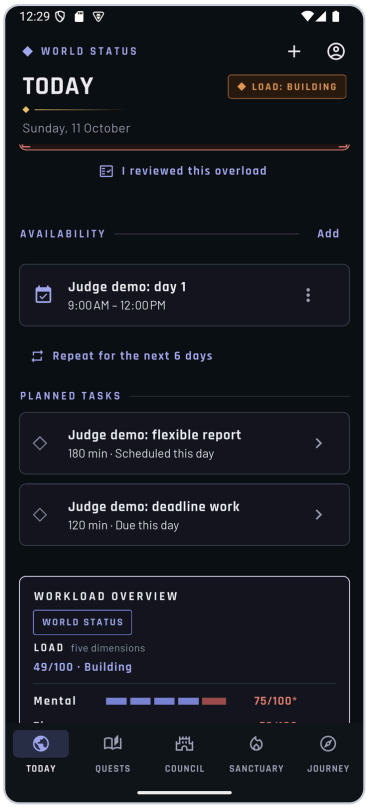

Step 2 — See the overload (TODAY)

What you see first. The top of Today answers one question: *does the day fit?*

1. If the date under **TODAY** is not the sample day, tap the → (Next day) arrow until it is. The middle label says *Viewing today*, *Viewing tomorrow* or the date.
2. **Time capacity** shows **3h available** and **5h planned**. The bar shows the part that fits (blue) and the part beyond capacity (red). The red tag says **2H OVER**.
3. Below it, the red **Capacity gap** card states the consequence: *120 minutes must be moved, reduced or recovered.* When a day fits, this card is green and says **Plan is balanced** instead.
4. The badge at the top right, **LOAD: BUILDING** (or Low, High, Over capacity), summarises the five workload bars further down. It is about workload, not about whether time fits.

Today: capacity and verdict

Today: availability and planned tasks

The day's time and work. Scroll down a little.

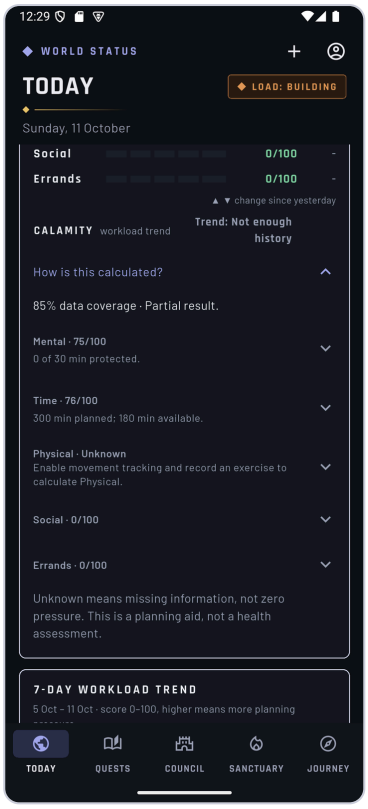

5. **Availability** lists the free time on this day: *Judge demo: day 1, 9:00 AM – 12:00 PM*.
   - **Add** (or **+** at the top) adds another time block.
   - The ⋮ menu on a block offers **Edit** and **Delete**.
   - **Repeat for the next 6 days** copies this day's time to the coming days. An empty day shows **Copy from** *(previous day)* instead. **On the shared judge account, please only look at these two buttons**, so the sample week stays the same.
6. **Planned tasks** lists what counts on this day: *Judge demo: flexible report* (180 min, scheduled this day) and *Judge demo: deadline work* (120 min, due this day). Tap a task to see why it counts on this day.

The five workload bars. Scroll further.

7. **Workload Overview · World Status** shows the **Load** total (for example *49/100 · Building*) and five bars in a fixed order: **Mental, Time, Physical, Social, Errands**.
   - Each bar is a score from 0 to 100; higher means more planning pressure.
   - A bar with no data says **Unknown**. Balance never treats missing data as zero.
   - An asterisk (*) after a score means it is partial: some of its inputs are unknown.
   - **▲ / ▼** next to a bar shows its change since yesterday (▲ more pressure, ▼ less), only when the previous day also has a record. A dash means no change.
   - **Calamity · workload trend** says *Rising*, *Stable*, *Easing* or *Not enough history*.
8. Tap **How is this calculated?** to open one line per bar: the score and its main reason (for example *Time · 76/100 — 300 min planned; 180 min available*). Tap a bar's line for the full breakdown. The last line reminds you that this is a planning aid, not a health assessment.

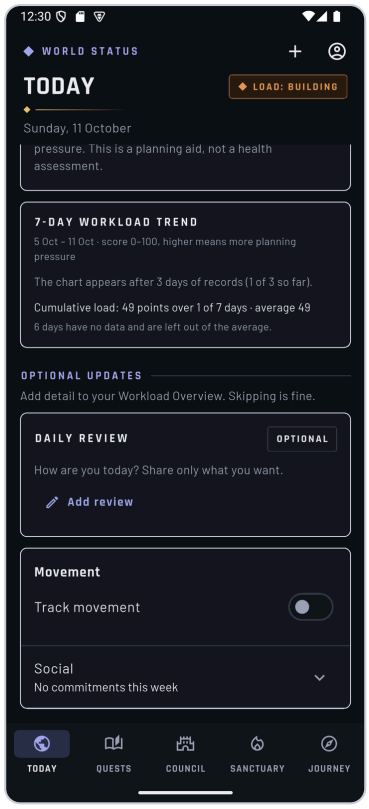

Today: five workload bars

Today: how the scores are calculated

Optional updates. At the bottom of Today.

9. **7-day workload trend** shows each day's total once at least three days are recorded; before that it says how many days are recorded so far. Missing days are never invented.
10. **Optional updates** add detail to the workload bars. Skipping them has no penalty.
    - **Daily Review** — *Add review* asks for mental energy, physical energy and hours of rest; **Skip for now** is always available.
    - **Movement** — *Track movement* turns on the Physical bar, with a preferred interval and *Record exercise*.
    - **Social** — expand it to add a social event or mark *No commitments this week*.

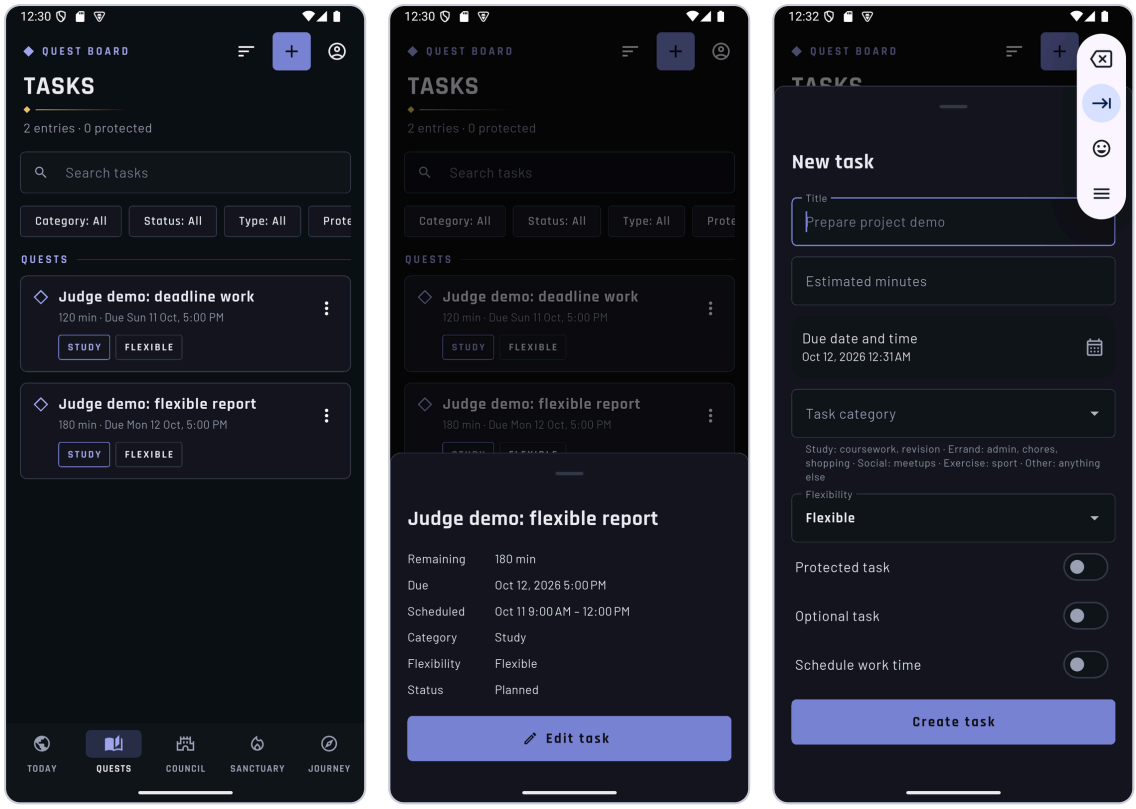

Today: trend and optional updates

Step 3 — Look at the tasks (QUESTS)

1. Tap **QUESTS** in the bottom bar. The page title is **TASKS** (*Quest Board*), with a count such as *2 entries · 0 protected*.
2. The sample tasks are below. Together they need 5 hours, but the sample day has only 3 hours free.

Task	Length	Scheduled	Deadline
Judge demo: flexible report	3h	9:00 AM – 12:00 PM on the sample day	The next day, 5:00 PM
Judge demo: deadline work	2h	Not scheduled	The sample day, 5:00 PM

3. **Tap a task card** to open its details: remaining time, due date, scheduled time, category, flexibility and status, with an **Edit task** button.
4. Optional: tap **+** to see the new task form, then close it without saving. A task needs a **Title**, **Estimated minutes**, **Due date and time** and a **Task category**; the form explains each category. **Flexibility** (Flexible, Fixed, Needs agreement), **Protected task**, **Optional task** and **Schedule work time** are set here too.

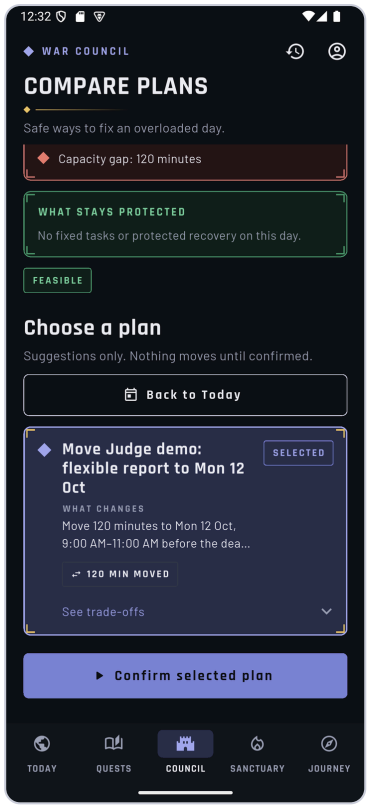

Quest Board | Task details | New task form

Step 4 — Read the suggested fix and confirm it (COUNCIL)

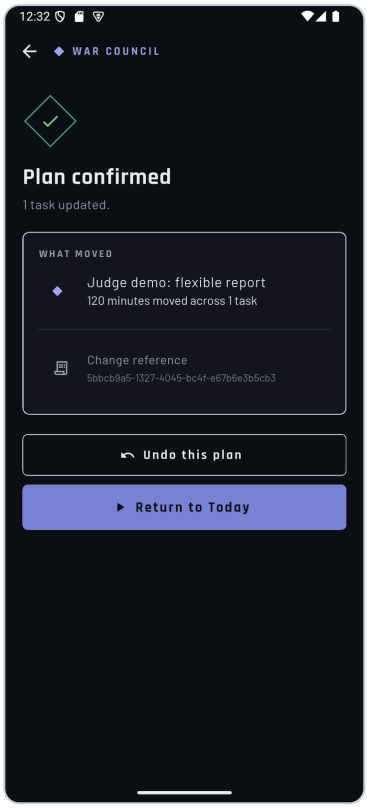

1. Tap **COUNCIL**. The page is **COMPARE PLANS** (*War Council*). Use the arrows so the date reads the sample day.
2. The top repeats the problem: **Over capacity**, **300 MIN planned → 180 MIN available**, *Capacity gap: 120 minutes*. **What stays protected** lists anything Council will never move (none on the sample day). The tag **FEASIBLE** means at least one safe option exists.
3. Under **Choose a plan** — *Suggestions only. Nothing moves until confirmed.* — the option reads **Move Judge demo: flexible report to** *(the next day)*: *Move 120 minutes, 9:00 AM – 11:00 AM, before the deadline.* Tap **See trade-offs** on the card to read the cost on the next day, what stays protected, the room created and anything to check.
4. Tap the option to select it (it shows **SELECTED**), then tap **Confirm selected plan**. The plan is saved at once; the server checks every rule again before saving. A soft chime plays if sound effects are on.
5. **Plan confirmed** lists what moved and offers **Undo this plan** and **Return to Today**.

Council: the problem

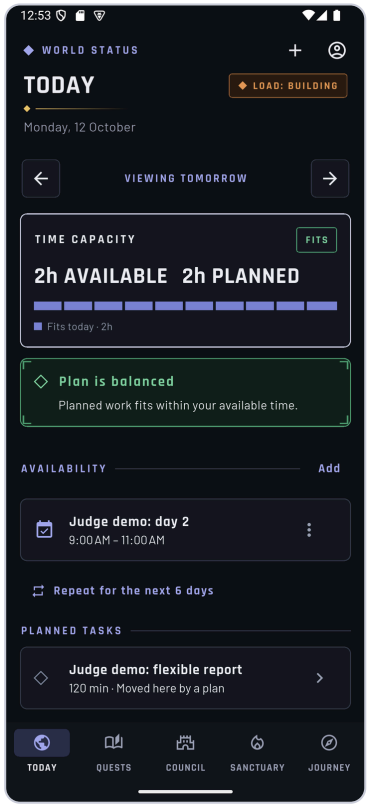

Council: the suggested option

Plan confirmed

6. Tap **Return to Today** and move to the next day: the report now shows **120 min · Moved here by a plan**, and the day still fits. Back on the sample day, the report shows the **60 min** that stayed there, and the day is no longer over capacity.

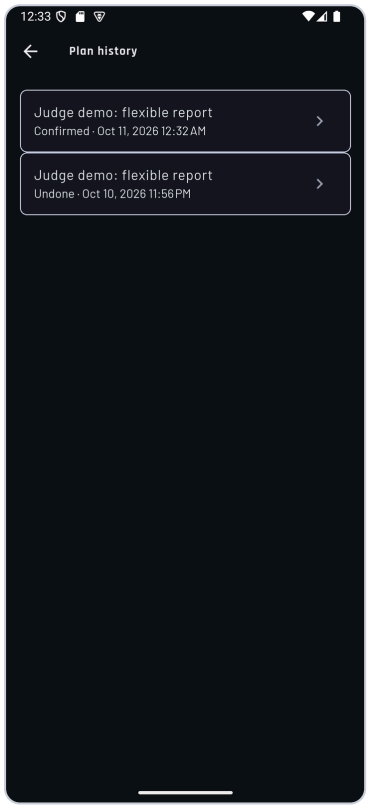

The next day after confirming

Step 5 — Undo the plan (COUNCIL → Plan history)

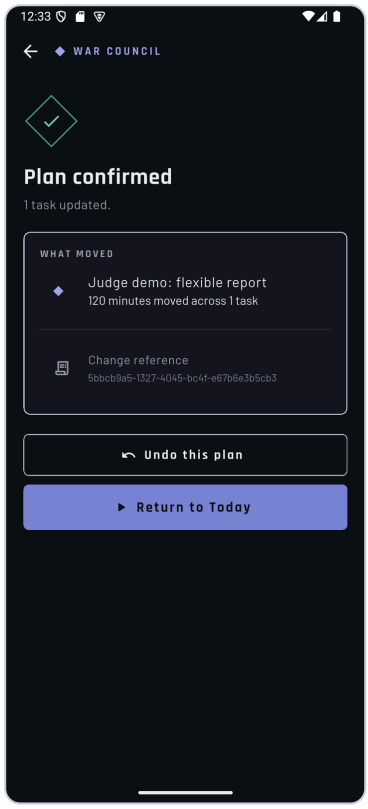

Any confirmed plan can be undone, even after leaving the result screen.

1. Open **COUNCIL** and tap the **Plan history** icon (clock) at the top right.
2. Tap the plan marked **Confirmed**. Its screen shows what moved; tap **Undo this plan**.
3. **Changes were undone** confirms the task was restored. On **TODAY**, the sample day is **2H OVER** again and the next day is free.

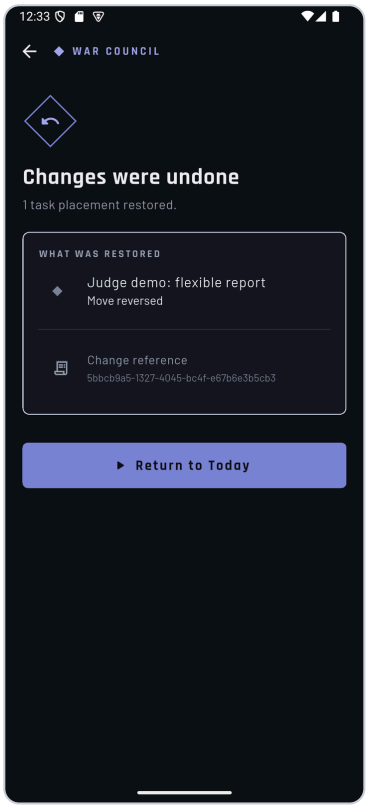

If the task was edited after the plan was confirmed, Undo is refused with an explanation instead of overwriting the newer change.

Plan history

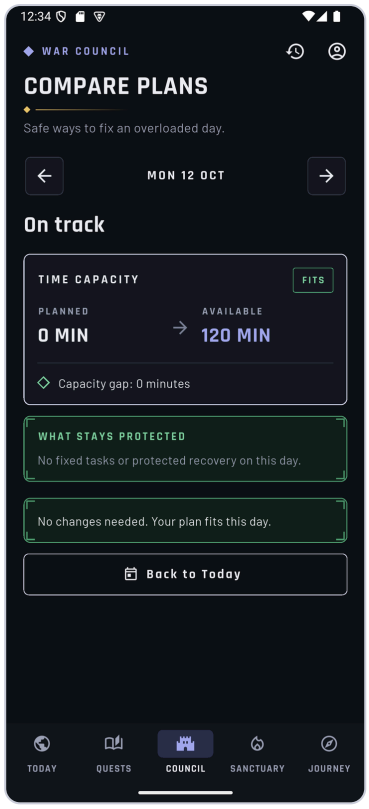

A confirmed plan with Undo

Changes were undone

Please always undo your plan, so the sample day stays ready for the next judge.

On a day that already fits, Council shows one line instead of options: *No changes needed. Your plan fits this day.*

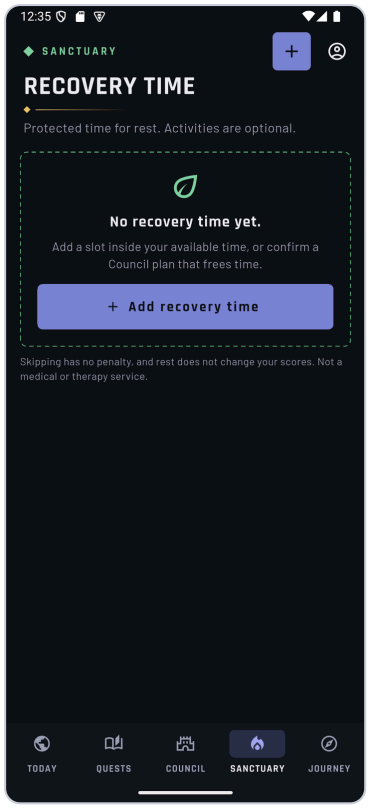

Council on a day that fits

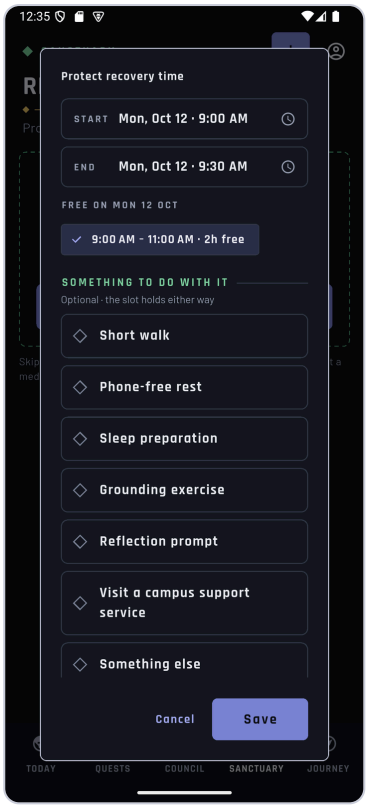

Step 6 — Protect rest time (SANCTUARY)

Recovery time is optional, and Balance only lets you protect time that is genuinely free.

1. Tap **SANCTUARY**. The page is **RECOVERY TIME**. With no slots yet it says *No recovery time yet* and offers **Add recovery time** (also the **+** at the top).
2. Tap **Add recovery time**. The form **Protect recovery time** finds free time for you: the sample day is fully booked, so it shows **Free on** *(the next day)* with the suggestion **9:00 AM – 11:00 AM · 2h free**, already selected as **Start 9:00 AM** and **End 9:30 AM**. Tap another suggestion, or tap Start or End to pick a time yourself.
3. **Something to do with it** lists optional ideas (Short walk, Phone-free rest, Sleep preparation, Grounding exercise, Reflection prompt, Visit a campus support service, Something else). The slot is protected whether or not you choose one.
4. Tap **Save**. The slot appears as **Protected time · TIME RESERVED**.
5. **Please remove it afterwards**: open its ⋮ menu → **Remove** → **Remove**. A slot on the next day would use the free time that the Council plan in step 4 needs.

Sanctuary with no slots

Protect recovery time with suggestions

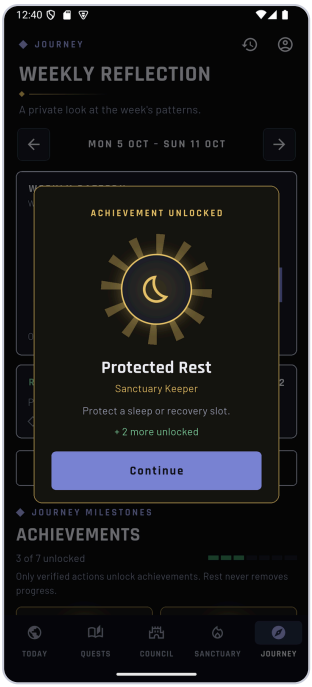

If you choose a time outside the available time, Balance explains why and offers **Go to Today** or **Choose another time**. Marking an activity done never changes a workload score; rest is not graded, and skipping it has no penalty.

Step 7 — Weekly summary and achievement wall (JOURNEY)

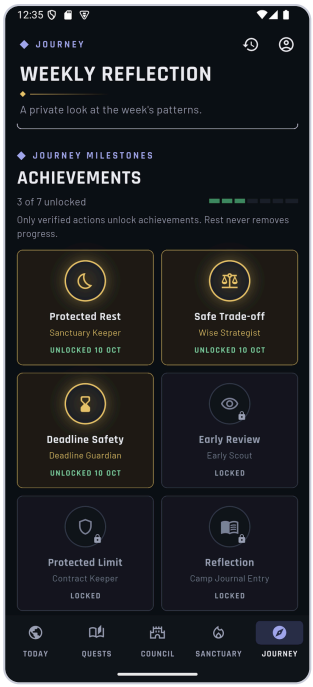

1. Tap **JOURNEY**. The page is **WEEKLY REFLECTION**. Use the week arrows to reach the week of the sample day.
2. **Weekly pattern** shows the recorded World Status score for each day; days without a record show no bar, and past scores are never invented. **Recovery kept** counts days with protected recovery.
3. Optional: **Add optional reflection** opens a short private note (*What worked for you this week?*). The **My reflections** icon (clock) at the top lists earlier reflections.
4. **Achievements** is a wall of seven badges. Earned badges glow gold with their date; locked badges are dimmed with a lock. **Tap a badge** to see how it is earned.
5. Confirming the plan in step 4 can earn **Safe Trade-off** (*Wise Strategist*) and **Deadline Safety** (*Deadline Guardian*). A newly earned badge is celebrated once with an **ACHIEVEMENT UNLOCKED** animation and a chime when you next open Journey. Badges are earned once per account, so some may already be unlocked if another judge used the account first.
6. **Team Coordination** stays **Locked**: it needs shared tasks, planned for a later version.

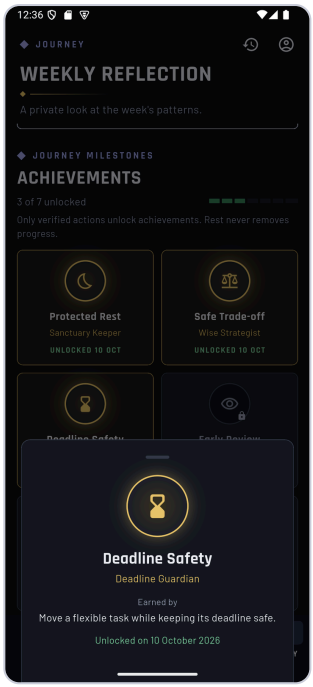

Journey weekly summary

Achievement unlocked

Achievement wall

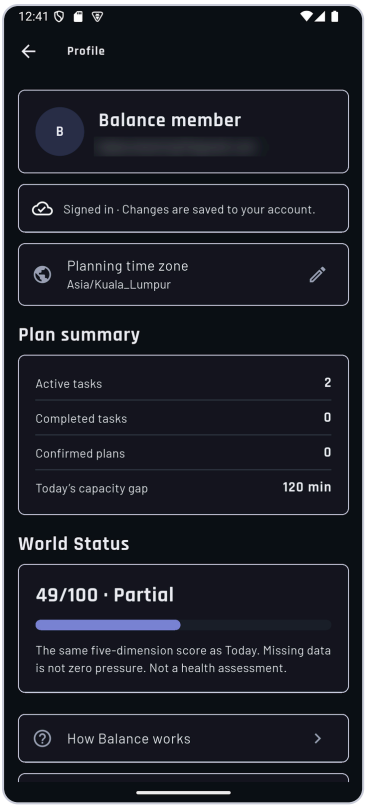

Badge details

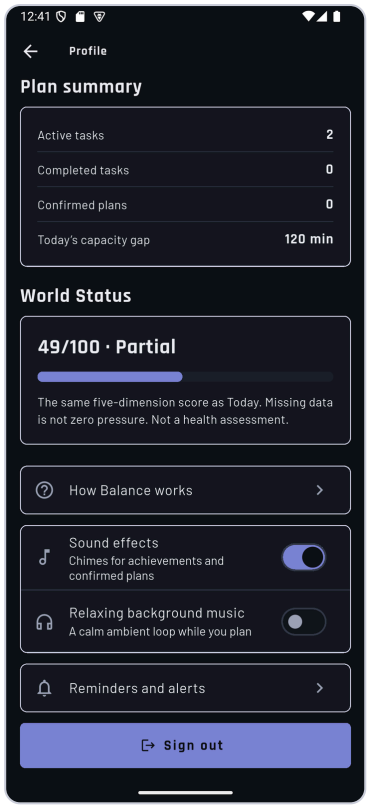

There are no streaks, rankings or penalties for skipping.

Step 8 — Profile, sound, reminders and alerts (optional)

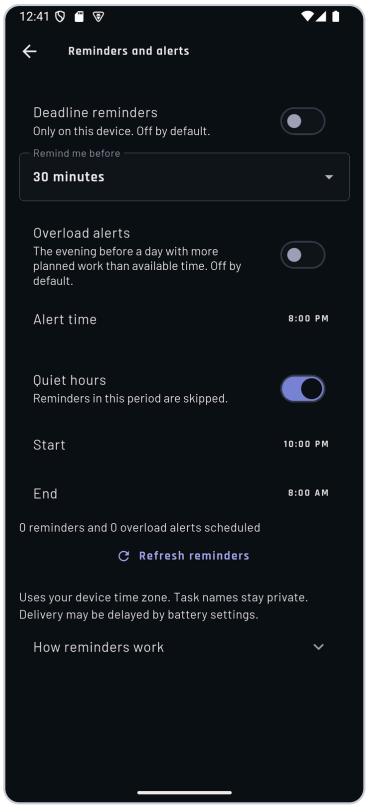

1. Tap the round **profile icon** at the top right of any main page.
2. **Profile** shows the signed-in account, *Signed in · Changes are saved to your account*, the **Planning time zone** (*Asia/Kuala_Lumpur*), a **Plan summary** and the same **World Status** score as Today.
3. **How Balance works** reopens the introduction.
4. **Sound effects** (on by default) plays chimes for confirmed plans and new achievements. **Relaxing background music** (off by default) plays a calm ambient loop and pauses when the app is in the background. All audio is original to Balance.
5. **Reminders and alerts**:
   - **Deadline reminders** — a reminder a set time before each task deadline.
   - **Overload alerts** — a notification the evening before a day with more planned work than available time; **Alert time** defaults to 8:00 PM.
   - **Quiet hours** — reminders and alerts are skipped between **Start** and **End**.
   - Both are off by default and ask for notification permission when turned on.
6. **Sign out** ends the session on this phone.

Profile

Profile settings

Reminders and alerts

Part B — Page reference

Bottom bar and header

Element	What it does
TODAY (globe), **QUESTS** (quest book), **COUNCIL** (castle), **SANCTUARY** (campfire), **JOURNEY** (compass)	The five main pages. The phone's Back gesture returns to Today, then leaves the app.
Eyebrow label (e.g. *WORLD STATUS*) and title (e.g. *TODAY*)	The game-style label and the practical page name.
Round profile icon	Opens Profile.
Clock icon	*Plan history* on Council; *My reflections* on Journey.
+	Today: add a time block. Quests: add a task. Sanctuary: add recovery time.

TODAY (World Status)

Element	Meaning
LOAD: Low / Building / High / Over capacity / No data	Summary of the five workload bars (0–24 Low, 25–49 Building, 50–74 High, 75–100 Over capacity).
← *Viewing …* →	Change the day shown.
Time capacity	Planned vs available time; tag **FITS**, **NO TIME ADDED** or **…H OVER**.
Capacity gap / **Plan is balanced**	The verdict for the day.
I reviewed this overload	Appears for an overload with a later deadline; recording it early can earn *Early Review*.
Availability	Free time blocks; **Add**, ⋮ **Edit/Delete**, **Copy from**, **Repeat for the next 6 days**.
Planned tasks	Work that counts on this day, with its minutes on this day and why: *Scheduled this day*, *Due this day* or *Moved here by a plan*. Tap for details.
Workload Overview	Load total and the five bars, ▲/▼ changes, Calamity trend, *How is this calculated?*
7-day workload trend	Daily totals for the last seven days once three are recorded.
Optional updates	Daily Review, Movement, Social.

QUESTS (Quest Board)

Element	Meaning
Sort icon	Sort tasks (for example *Due soonest*).
Search	Filter by title.
Category / Status / Type / Protection chips	Filters; *Clear filters* resets them.
Sections	*Sacred contracts* (protected), *Quests*, *Finished*.

Element	Meaning
Tags	**OVERDUE**, the category (STUDY, ERRAND, SOCIAL, EXERCISE, OTHER), flexibility (FLEXIBLE, FIXED, NEEDS AGREEMENT), **PROTECTED**. An old task without a category shows *Uncategorized · Needs Review*.
⋮ menu	**Mark as done** / **Mark as not done**, **Edit**, **Delete**. Marking an Exercise task done asks whether to record the exercise; *Skip* records nothing.
Tap a card	Task details with **Edit task**.

COUNCIL (War Council)

Element	Meaning
Status tag	**FEASIBLE** (a safe option exists), **NEEDS REVIEW** (information missing), **NEEDS AGREEMENT** (someone else must agree), **NO FEASIBLE PLAN** (no safe move).
What stays protected	Fixed and protected tasks and protected recovery that will not move.
Option card	What moves, where and when; **See trade-offs** shows cost, protection, room created and checks.
Confirm selected plan	Saves the selected option after the server re-checks it.
No safe move found	Explains why (for example a task with no start time, or recovery time using the only free time) and offers **Review tasks** or **Add free time on Today**.
Plan history	Every confirmed plan; open one to **Undo this plan**.

SANCTUARY (Recovery time)

Element	Meaning
Add recovery time	Opens *Protect recovery time* with free-time suggestions.
Slot card	*Protected time*, the time, **TIME RESERVED**; ⋮ **Edit/Remove**; *Activity done* once it has started.
Footer	Skipping has no penalty; rest does not change scores; not a medical service.

JOURNEY (Weekly reflection)

Element	Meaning
Week arrows	Change the week shown.
Weekly pattern	Recorded daily scores; no bar means no record.
Recovery kept	Days with protected recovery out of recorded days.
Add optional reflection / **My reflections**	Write and read private notes.
Achievements	Seven badges; tap one for its condition and date.

The seven achievements

Badge	RPG name	Earned by
Protected Rest	Sanctuary Keeper	Protecting a sleep or recovery slot.
Safe Trade-off	Wise Strategist	Confirming a plan without breaking protected commitments.
Deadline Safety	Deadline Guardian	Moving a flexible task while keeping its deadline safe.
Early Review	Early Scout	Reviewing an overload before the deadline day.
Protected Limit	Contract Keeper	Protecting a work shift, family duty or sleep minimum.
Reflection	Camp Journal Entry	Saving an optional reflection.
Team Coordination	Team Navigator	Marking a shared task as Needs Agreement (later version).

Part C — Glossary, privacy, troubleshooting and limitations

Glossary

Practical name	RPG label	Meaning
Workload Overview	World Status	Today's capacity, verdict and five workload bars.
Tasks and protected commitments	Quest Board, Sacred contracts	Your tasks; protected ones never move.
Plan comparison	War Council	Safe ways to fix an overloaded day.
Recovery time	Sanctuary	Protected free time for optional rest.
Weekly reflection	Journey	Private weekly summary and achievements.
Overload alert	Calamity Alert	Optional evening notification before an overloaded day.
Unknown	—	No data yet. Never treated as zero.
Partial (*)	—	Some inputs of a score are unknown.

Privacy and safety

- Each account sees only its own data; the database enforces this.
- Reflections and the weekly summary are private. There are no rankings or comparisons.
- Notifications use generic wording without task titles.
- Crash reports contain errors only: no screenshots, IP address or email.
- Balance is a planning aid. Its scores describe recorded planning data; it is not a medical, diagnostic or mental-health tool.

If something goes wrong

What you see	What to do
"Could not connect" with **Try again**	Check the internet connection, then tap **Try again**. Data already on screen stays visible.
The sample day is not 2h over	Check that you are on the sample day. If a plan is still confirmed, undo it in **COUNCIL** → **Plan history**.
Times look several hours off (for example availability at 1:00 AM)	Set the phone to Malaysia time (Settings → System → Date & time → automatic time zone), then reopen Balance.
Council shows **No Feasible Plan** on the sample day	A recovery slot is using the next day's free time; the explanation names it. Remove it in **SANCTUARY** (step 6.5).
The introduction does not appear	It shows once per phone. Open **Profile** → **How Balance works**.
No sound	Check **Profile** → **Sound effects** and the phone's media volume.

What you see	What to do
Sign-in fails	Check the email and password from the submission form for typing errors.
"Can't install app"	Uninstall any earlier Balance build first, then install again.

What Balance does not claim

- Android is the supported platform. iOS has not been tested on a device, and the web build is not part of this submission.
- Every task needs a deadline; a "No deadline" option is not available yet.
- Shared tasks and the Team Coordination badge are planned for a later version.
- The app is currently English-only. Bahasa Melayu and Chinese are planned.
